```

- Switch to your new issue-1 branch by using the **git checkout** command.
- Once you are on the issue-1 branch, change the helloWorld.py file. Modify your program to accept input from the user and then print out the inputted data.
- Add and commit your changes.
- Check out the master branch and use the **git merge** command to merge branches.
- Take a screenshot of the output after running the **git merge** command and upload it to the task folder.
- Name the submitted image file: **git_merge.pdf** or **git_merge.jpeg**.
